BOTTLE OF FRESH NOOSE

"Red" Reynolds—Editor.
"Max" Landsberg—Athletics.

Although the team that represented Grayling high school did not fare wel at the state tournament, the experince they gained through the trip was well worth their time. Scenes on the Michigan Campus

were particularly interesting, espec-ially the large and modern buildings and the students passing to and from classes. College stores and the beauiful fraternity houses were also much admired. The teams were given a banquet at the Michigan Union Thursday evening, Coach E. J. Mather of the U. of M. being a speaker.

Holly won the class "C" champion-ship by defeating Carson City in the final game. Some of the G. H. S. basketeers visited Waterman Gym and saw Coach Fisher's U. of M. base ball team working out. All the boys have arrived home and feel the experience was well worth the trip.

Petoskey Tournament.

Emerson J. Brown, our midget right forward, was named on the all Tour nament team, selected by "Chief" Nevitt of Bay City. He also took honors for making the most number of points in one game, scoring nineteen points against Elk Rapids. The honors for foul shooting were also carried by Brown. Grayling drew Gaylord and played them at 7:45 Thursday night; this game was an easy victory for the Hoboes and made the third straight victory over them. Friday morning at 8:30 the Hoboes swung into action

For a Better Town

Conducted by Grayling

Within the recent past it has been brought to the attention of the Board of Trade that several people have wanted to buy homes in Grayling. There are often times homes which can be bought but in most cases they are not such homes as most people are looking for these days. Most people want a home with modern conveniences and people who already own such homes are not willing to sell. Neither are modern homes available for rent. Therefore a great many people are not enjoying the home comforts they would like.

BUILD YOUR OWN HOME

The Board of Trade wants to encourage home building and is anxious that as many people as possible have modern homes with as many comforts as can be obtained. We therefore urge every person who is interested in securing a home in Grayling, that they tuy a lot and build a home that will be their ideal. Build such a home as they would like to have and can afford, according to well laid plans. Also to those who already own their homes but do not have modern conveniences and comforts, we urge them to remodel and provide those comforts desired. There things can be done and are within the reach of a great many at the present time.

FINANCIAL ASSISTANCE.

Did it ever happen to you, an evening at home, talking things over with good wife and how the subject of having a home of your own or re modeling the present home has been discussed. How often have you put forth the argument that you could not afford it or did not have a sufficient amount of money to complete the work. You can afford it and should. If you haven't enough money to complete the work let us advise you to call on our banker, Mr. Marius Hanson who will loan you money up to fifty per cent or one half the value of the property which in a great many instances will permit the building of new homes or remodeling the old homestead. Mr. Hanson is ready and willing at all-times to lend assistance in building your home. Ask him for his advice in the matter and you will find he has a lot of good things for you besides the money you are looking

THE FINISHING TOUCH.

And incidentally, when you have completed your home, remodeled or having built it entirely new, put the finishing touch on the lot. Put in a fine lawn, lots of shrubbery and a few beautiful shade trees. These added their cost, to the value of your property.

Now let us have a few more new modern homes in Grayling, this summer. Join the Board of Trade, we are for you and Grayling. Board of Trade meets Monday evening, April 9th, 8 p. m.

# Not a Laxative

Nujol is a lubricant -- not a medicine or laxative -- se cannot gripe.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method - lubrication.

Aday it shows the Railroad Company is just as anxious to open the Johannesburg line as the people are to have them do so. On Friday last an effort was do clear the tracks on that line, and after four hours effort a quar-ter of a mile of track was opened. In the crew there were eighty men, four large F-82 type engines, snow plow and flanger. At the rate of progress that was being made it would have required from 10 to 15 days to reach Johannesburg if they ever did get there for there was good reason to here, for there was good reason to believe that more than one of the en-gines and the snow plow would have been in the ditch before they could rrive at their destination,

### BETTER NOT SAY IT!

Bad news travels faster than good news. There is an old saying, "No news is good news." Let a man be converted at a church service and there is not much of a stir, but let a resident be convicted of some crime and the news leaps by word of mouth from one end of the community to the

How thoughtlessly unkind we some times are when neighbors of ours suffer misfortune! Troubles are bound to come to us all in some shape or form and what we say about our friends and acquaintances today may apply to us tomorrow. News is no spector of persons.

We are prone to consider the ways

We are prone to consider when we of others not our ways when we of others not our step. What should be watching our step. Wha folks say of one another sometime hurts more than anything they could have done. News, either good or bad, grows and becomes exaggerated and distorted with peddling. When the news is good it makes no material difference how it is exaggerated or distorted—it can never do anyone distorted—it can never do anyone positive harm. But bad news, given wings, may bring sorrow and ruin upon people who certainly are not deserving of a punishment beyond the penalty of their mistake.

more charity for ourselves and we wil gradually come to take keener delight in reporting something good of some person than something bad. Good is constructive, bad in destructive. Just before you are about to let out a bit of "bad news," stop and think a moment. See if you can't think of something good to say in place of it. The chances are ten to one that you can and that you will,

#### Farm Bureaus.

In a spirit of optimism and an attitude of genuine satisfaction farmers and business men throughout the country are expressing their appreciation of the work done by Farm Bureaus wherever these organizations have been established.

One act alone that Farm Bureaus have been instrumental in putting over is worthy of their organization the forming of co-operative market-ing associations. In starting soil building programs in every county, Farm Bureaus are also doing a great constructive work of much value to every farmer. Membership in the Farm Bureau being a family proposi tion, one can expect some real ac-complishments along specialized lines such as better preparation, more thorough cultivation, more good live-stock and legislation favorable to the furtherance of agriculture and its

It is well known that these who are not members of the Farm Bureau have been benefitted by it. They have not benefitted to the extent of the memprice level and the outsider profited operative association has raised the thereby. They have received better grades, and nearer the market prices for their products. To these thing the thousands of members will testify The good done by the Farm Bureau To these thing

The good done by the Farm Bureaus is only a drop in the bucket to what remains for them to do and what they will do. The farmer is soon to come into his own. Organization is the force which will place him there. The business man is not the farmer's enemy for the farmer was the farmer's enemy for the farmer was the farmer. my for the farmer must prosper incorder that the business man may make money. A Sickly Child

Mahoningtown, Pa.—"I would like to say a few words about Lydis E. Pinkham's Vegetable Compound. About a year ago I thought it would be necessary for me to take my daughter out of school. She was losing weight, was nervous, and when she would come home from school she would drop into a chair and cry, and say, 'Mamma, I don't believe I can go to school another day!' I

gave her Lydia E. Pinkham's Vege-table Compound and now she is a healthy, happy, hearty, strong girl and weighs 120 pounds. She has no difficulty in doing her 'gym' work, and abe works at home every night and morning, too. I am a mother who can certainly praise your medicine, and if it will be of any benefit you may the this letter as a reference."

—Mrs. GEORGE E. WRITAGEZ, 621 We. Madison Ave., Mahoningtown, Pa.

Every girl wants to be healthy and strong, and every mother wants her daughter to do well in school and to enjoy herself at all times.
Lydis E. Pinkham's Vegetable Compound is a splendid medicine for young girls just entering womanhood. Mothers may depend upon it. # "HALF CENTURY" BRAND WHITE CEDAR SHINGLES.

There is no wood that can excel White Cedar in weather-resisting quality. That's why it is such a wonderful shingle wood. And "Half Century" Shingles are the best White Cedar Shingles because they are made the right thickness and are air cured.

Shingles that are cut too thin or are too hastily seasoned, as is apt to e the case when they are cured under the dry kiln process, are liable to split in nailing and they have a tendency to crack, curl and warp.

"Half Century" Shingles are cut right, cured right and they last as long as their name indicates. And they stain beautifully in any shade. All lumber dealers can supply you. (Look for the trade-mark on very bundle. It's your guarantee of quality.)

Farmers generally call it blight; but,

Don't put off this sorting. If you wait until snow is gone and pleasant weather comes, you won't half sort or treat your seed potatoes. You will be crazy busy. You will be hustling that manure out, and getting oat ground ready, and will hardly know which way to turn. And you will join that large army of farmers who plant untested, common seed, saying: "Oh well! I always used to get good crops without all this monkey work. Thave had just as nice potatoes from seed no larger than marbles-as-I ever had."

Say, brother! "Them days is kone

Say, brother! "Them days is gone forever." The farmers who keep singing that song are the ones who never get much satisfaction out of

I have, with my own hands, picked out and treated 190 bushels of seed This-s

potatoes in one spring.

Change to Seed.

Better yet, would be to get a few bushels of the choice certified seed potatoes from Otego County. Where that seed has been shipped to other states, or to Southern Michigan, cer-

tified seed has outyleded common seed fifty to one hundred bushels per

seed fifty to one nunural pushes acres.

Come up to my office and I will show you a list of names and adresses of farmers who did it.

"No gains without pains" is an old saying, and a true one.

Let's make praiseworthy effort to do the best things; to get out of ruts; to be progressive; to do the way successful farmers do. Let's learn "to take pains."

Seed Oats. Oats are a scrubby lot here. Most of us need new, better seed. Our seed oats, like our cattle, our potatoes, are about run out.

Get the Wolverine.
Our Agricultural College has developed seed oats for light soil, and for heavy soil. These oats are outyield-ing local, common varieties. The Wolverine is the kind for our soil. A lot of farmers belonging to the Michigan Crop Improvement Association have these for sale. I have s list of their names, and where they live, and what they charge for the seed. Use your County Agent. Get acquainted with him. You might not regret it. His services are not for any favored few. They are for all. Many a farmer who is crippling along in a lame way could be given suggestions that would help. way gome would help.

Better Calves.

This is peculiarly the season of the year when a farmer shows his gumption, or lack of it. If he has grit and gumption he gets good seed corn, seed oats, seed potatoes, and leads his cows miles if necessary to high-class sires A farmer really reveals his true character through the things he stands for. He stamps himself as an outstanding, upward striving, progressiand standing, upward striving, progressive farmer if he tries to get and do the best. If he stands for scrub seed, scrub methods, scrub bulla and scrub stock, the world plainly reads that nature deep seated in the man himself.

Fellow farmers, why not say: "If anyone does better than I do this year

or makes more improvement in the looks of his place than I do, I'll give him a run for his money."
